HENRY M. BATTERS
Market Editor
THEODORE R. OLIVE
Assistant Editor

CHEMICAL & METALLURGICAL ENGINEERING

R. S. McBRIDE, Washington
PAUL D. V. MANNING, San Francisco
Assistant Editors

H. C. PARMELEE, Editorial Director
S. D. KIRKPATRICK, Editor

Chemical & Metallurgical Engineering is the successor to Metallurgical & Chemical Engineering, which, in turn, was a consolidation of Electrochemical & Metallurgical Industry and Iron & Steel Magazine. The magazine was originally founded as Electrochemical Industry.

McGraw-Hill Publishing Company, Inc., New York City

Volume XXXV

From January 1 to December 31, 1928

GENERAL ALPHABETICAL INDEX

	Pages
January	1 to 72
February	73 to 136
March	137 to 200
April	201 to 264
May	265 to 328
June	329 to 392
July	393 to 456
August	457 to 520
September	521 to 592
October	593 to 656
November	657 to 720
December	721 to 784

A

Abrasion, Protection against (P. N.)	697
Absorbers, Calculations for natural gasoline, Lewis	93
Absorption and adsorption in modernization	578
Accumulators, Steam (S.)	241
Acetate of lime, improved position	63
Acetic acid, Synthetic (S.)	112
Acetylating wood (S.)	432
Acetylene equipment (E. N.)	309
Acidophilius therapy, Chemical engineering advances, Olive	616
Acid resisting alloy (E. N.)	499
Acids, e. p., produced by electricity, Hoff	419
Address before Chamber of Commerce of the U. S. A. Mehren	290
Adsorption from liquid phase used in many operations, Gill	579
Aeration (S.)	759

Agitator:

—Drive (E. N.)	701
—Impeller (E. N.)	245
—Tubular (E. N.)	699
—Venturi slurry (E. N.)	499
—Wheel (P. N.) Raymond	113
Aircraft finishing, Martin	404

Air:

—Filter, Double pass (E. N.)	200
—Properties, Jones (P. N.)	180
—Separation studies, Isothermus and isobars for, Dodge	622
—Separators make fine grinding and classification possible, Sturtevant	575
—Sterilizing process, Patent grant for	630
Alcohol (S.)	303

Alcohol-Gasoline blend shows advantages in road tests	95
Algin produced commercially	360
Alkalis, estimated production and distribution	60
Allied Chemical and Dye Corporation, Organization Chart	7
Alloys, aviation (S.)	493
Alloys, copper-aluminum (S.)	178
Aluminum-copper alloys (S.)	178
Aluminum equipment (S.)	178
Aluminum ware (S.)	303
Aluminous ores, Methods proposed and in use for refining, Mantell	746
American Chemical Society, meeting at St. Louis, Staff	274
American Chemical Society, meeting at Swamscott, Staff	614
American Electrochemical Society's spring meeting, Bridgeport, Staff	281
American Electrochemical Society's meeting at Charleston, W. Va., Staff	601
American Gas Association studies production problems, Staff	345
American Gas Association holds annual convention and exhibit	641
American Gas Association convention emphasized technology in gas industry, Staff	665
American Institute of Chemical Engineers' tour (Edit.)	458
—Tour with British engineers reported	534
—Holds annual meeting	769

American Institute of Mining and Metallurgical Engineers, petroleum sessions discuss heat economics	167
American investments in foreign chemical industries (C.)	110
American Society for Testing Materials meeting	406
Ammonia:	
—Byproduct, looking into the future of, Ramsburg	417
—Hydrogen from coke oven gas gives cheap, Pallemarts	741
—Oxidation replaces niter for chamber acid plants, Spangler	342
—Position improved last year	63
—Products, domestic production and sale	63
—Synthesis (S.)	303
—Synthetic, costs in America, Tour 89,	162
—Synthetic, costs, Tour (C.)	238
—Synthetic, industry makes progress, Quinn	48
—Synthetic, costs, Clark (C)	237
Anglo Canadian Pulp and Paper Mills, Ltd., Buchanan	204
Anthraquinone dyes (S.)	178
Arsenic and arsenicals, large carryover	61
Austrian interests and I. G. in sales agreement	119
Azoic colors (S.)	240

B

Baking and japanning (S.)	693
Baking, Better (S.)	368
Balance, Variable sensitivity (E. N.)	436
Barium salts for water softening, Rodman	221
Bartling process (S.)	693
Batch control, Planning board for (P. N.)	306
Bayer process for alumina, Mantell	746
Beamhouse operation (S.)	494
Bearing, Dust-proof conveyor (E. N.)	309
Belgian Chemical Unions' ammonia plant at Ostend, Pallemarts	741
Belts, Non-slip (S.)	368
Benzene hydrocarbons (S.)	693
Berger process for alumina, Mantell	748
Bergius talks before Coal Conference, Staff	728
Bergius tells chemists of carbohydrate synthesis, (Edit.)	723
Bichromate of soda held steady course	58
Bin gate, Frictionless (E. N.)	699
Bitumen gun (E. N.)	308
Blanc process for alumina, Mantell	749
Blau gas replaces gasoline in Graf Zeppelin	671
Blowpipe, New cutting (E. N.)	117
Blue, Berlin (S.)	304
Boiler feed water treatment advances to ward exact science, Holmes (P. N.)	695
Boiler, Small electric, Rudin (P. N.)	433
Bok medal to McGraw	186

Book Reviews:

—Abmessungen von Hoch- und Martinöfen M. Pavloff	431
—A directory of applied chemistry, Sir Edward Thorpe	108
—Allen's commercial organic analysis, vol. VI	176
—A.S.T. handbook	692
—A.S.T.M. standards, 1927	107
—A.S.T.M. standards	692
—Annual reports of Society of Chemical Industry	431
—Annual survey of chemistry, Edited by C. J. West	239
—Annual tables of constants, Union of Pure and Applied Chemistry	630
—Atlas Metallurgicus, H. Hancmann and A. Schrader	174
—Atomstruktur und Atombindung, J. Stark	367
—Banana: its history, cultivation and place among staple foods, P. K. Reynolds	175
—Behavior of prices, F. C. Mills	367
—Cements, limes and plasters, E. C. Eckel	627

Book Reviews, continued:

—Chemical calculations, J. S. Long and H. V. Anderson	630
—Chemical effects of alpha particles and electrons, S. C. Lind	628
—Chemical encyclopaedia, C. T. Kingzett	691
—Chemical engineering catalogue, 1928	629
—Chemistry in medicine, J. Stieglitz	757
—Chemistry of leather manufacture, J. A. Wilson	239
—Chemistry of the sulphite process	430
—College chemistry, Neil E. Gordon	629
—Colloid chemistry, The Svedberg	756
—Commerce yearbook, 1928	492, 758
—Comprehensive survey of starch chemistry, R. P. Walton	429
—Comprehensive treatise of inorganic and theoretical chemistry, J. W. Mellor	431
—Creation by evolution, Frances Mason	758
—Critical studies in the legal chemistry of foods, B. O. Brooks	429
—Destillieren und Rektifizieren, K. Thormann	239
—Disposal of sewage, T. H. P. Veal	429
—Electric heating, E. A. Wilcox	490
—Electronic theory of valency, N. V. Sidgwick	301
—Elementary organic chemistry, H. Adkins and S. M. McElvain	492
—Elementary practical physical chemistry, F. S. Taylor	628
—Elemente der achten Gruppe des periodischen Systems, E. Rabinowitsch	430
—Elements of qualitative chemical analysis, W. W. Scott	630
—Engineering Index, 1927 A.S.M.E.	431
—English for engineers, S. A. Harbarger	176
—Evolution de la fabrication de l'acide sulfurique	367
—Finding and stopping waste in modern boiler rooms, G. H. Gibson	691
—Fixation of atmospheric nitrogen, F. S. Ernst	627
—Foundry work, R. E. Wendt	367
—Fundamentals of dairy science	239
—Gli acide inorganici, A. Aiti and H. Molinari	367
—Guide to the literature of chemistry, E. J. Crane and A. M. Patterson	367
—Handbook of petroleum, asphalt and natural gas, Roy Cross	691
—Handwriting on the wall, A. D. Little	690
—History of the explosives industry in America, A. P. Van Gelder and Hugo Schlatter	107
—Hydrochloric acid and sodium sulfate, N. A. Laury	366
—Industrial chemistry of the fats and waxes, T. P. Hilditch	491
—Introduction to general chemistry, W. M. Blanchard	429
—Laboratory glass blowing, F. C. Frary, C. S. Taylor and J. D. Edwards	492
—Laboratory investigation of ores, E. E. Fairbanks	691
—Laboratory manual of colloid chemistry, H. N. Holmes	430
—Laboratory manual of elementary physical chemistry, E. Mack, Jr. and W. G. France	628
—Laws of management applied to manufacture, L. P. Afford	757
—Lubricating greases, E. N. Klemgard	107
—Making of a chemical, E. I. Lewis	107
—Manufacture of artificial silk, E. Wheeler	756
—Manufactured gas, H. J. J. Morgan	490
—Mathematical preparation for physical chemistry, F. Daniels	366
—Mechanical world yearbook	302
—Mechanism of homogeneous organic reactions, F. O. Rice	491
—Messen und Wägen, W. Block	692
—Metallurgists manual, T. G. Bamford and Harold Harris	108

NOTES—(c) Comment; (E. N.) Equipment News; (P. N.) Plant Notebook; (S) Synopsis or abstract.

Book Reviews, continued:

- Microbiology of cellulose, hemicelluloses, pectins and gums. A. C. Thaysen and H. J. Bunker. 302
- Mineral industry in 1927. G. A. Roush. 691
- Mineral resources of the U. S. in 1925 492
- Mining engineers' handbook. Robt. Peele. 174
- Modern calorimeter. W. P. White. 628
- Molecular physics. J. A. Crowther. 175
- Nitroglycerine and nitroglycerine explosives. P. Naoum—E. M. Symmes. 690
- Optic and microscopic characters of artificial minerals. A. N. Winchell. 301
- Oxidation-reduction reactions in inorganic chemistry. E. R. Jette. 175
- Papers and addresses. T. A. P. P. I. 630
- Paper testing methods. T. A. P. P. I. 430
- Patent essentials. J. F. Robb. 491
- Photochemical processes. G. B. Kistakowsky. 490
- Postponing strikes. H. M. Selekman. 174
- Practical color simplified. W. J. Miskella. 691
- Practical industrial furnace design. M. H. Mawhinney. 690
- Proceedings of A. G. A. 692
- Proceedings of N. F. A. 292
- Proceedings of metals division. A. I. M. E. 630
- Properties of silica. R. B. Sosman. 366

- Technical methods of chemical analysis. G. Lunge and C. A. Keane. 629
- Technical methods of ore analysis. A. H. Low. 176
- Technische Gase. F. Muhlert and K. Drews. 491
- Technology of low temperature carbonization. F. M. Gentry. 756
- Textbook of inorganic chemistry. Friend, Metal amines. M. M. J. Sutherland. 629
- Textbook of inorganic chemistry. Friend, Nitrogen. E. B. R. Prideaux and H. Lambourne. 629
- Theoretical and experimental physical chemistry. J. C. Crocker and F. Matthews. 627
- Theorie der Reduktionsfähigkeit von Steinkohlens. G. Agde and H. Schmitt. 431
- Thermionic phenomena. E. Bick. 239
- Weltproduktion und Weltbedarf von Atherischen Olen. H. H. Lander. 758
- Who's who in the chemical and drug industries. W. Haynes. 691
- Brass and copper pipe, bursting pressures of. Schneider. 104
- Brass ingots (S.). 303
- Brick, Acid-resisting (E. N.). 635
- Budget, Improvement forecast in new British (Edit.). 267
- Buildings, Well designed, pay their way. Ferguson. 536
- Burns, Chemical (P. N.). 702
- Byproducts, from coke-oven operations in 1926. 62
- C**
- Cadmium plating (S.). 111
- Calcein. Experimental electric rotary. Burgess; Ellerbeck (C.). 109
- Calcium bisphosphate ruled fine chemical Calculator for coal heat unit cost (E. N.). 181
- Calculations of losses in dissolving, leaching and extraction. Iredell. 685
- Calorimeter (S.). 368
- Camphor, synthetic, competes with natural Capstan, electrically driven (E. N.). 764
- Carbon:**
- Activated, in modern purification methods. Glick. 581
- Decolorizing (S.). 112
- Dioxide (S.). 112
- Dioxide purifier (E. N.). 182
- Electrode technology, Five years' progress in. Mantell. 84
- Products manufacture, raw materials control facilitates. McBride. 724
- Products plant, Straight line flow of materials in. McBride. 548
- Carbonization (S.). 368
- Carbonization (S.). 369
- Carbonization by Bartling process (S.). 693
- Carbonization process refinement marks plant trends (Edit.). 43
- Casale process at Union Clinique Belge, Ostend. Pallemarts. 741
- Casein (S.). 178
- Casein (S.). 432
- Catalysis (S.). 631
- Catalysts, Contact (S.). 693
- Catalysts and Catalyst carriers (S.). 759
- Catalyst, Vanadium, for sulphuric acid. Nickell. 153
- Catalytic oxidation of oils on a commercial scale. Bitler, James. 156
- Caustic, Dissolving drum. Drew (C.). 110
- Worth-while economies in producing chlorine and caustic soda. Kirkpatrick. 158
- Cellite Products Company. Manning. 460
- Cellophane (S.). 432
- Celluloid articles (S.). 177
- Celluloid Company of America. Landes. 524
- Cellulose for carbohydrates (Edit.). 723
- Cellulose, Nitrating (S.). 112
- Cellulose, Nitrating (S.). 177
- Celluloses (S.). 432
- Cement:**
- Industry conspicuous in application of chemical engineering. Young. 751
- Industry, Organized safety work pays in. Posselt. 626
- Mill modernization demands larger units. 563
- New England's only mill. Sonntag. 623
- Portland (S.). 369
- Portland, Economies in production at new mill. Staff. 270
- Preventing excessive wear in mills. Field. 96
- Census of manufacturers (Edit.). 75
- Centrifugal separation demonstrates improvements and new applications. 573
- Centrifugal salt drying. Lewis (C.). 689
- Centrifuges, Large (S.). 241
- Centrifuge Super- (S.). 368
- Centrifuge Super- (S.). 303
- Ceramic filters (S.). 177
- Ceramic industries, inter-dependence with chem. eng. Greaves-Walker. 20
- Ceramic ware (S.). 111
- Ceramic ware, Drying (S.). 759
- Chamber of Commerce convention addressed by prominent speakers. 314
- Charleston-Chemical capital? (Edit.). 594
- Charleston, W. Va., chemical industry in (Map). 161
- Charleston industries entertain A. E. S. 601
- Chart hub (E. N.). 499
- Charts and Graphs:**
- Chemical industry in 1927. 56
- Chemicals underlie inter-dependence. 3
- Coal-tar dyes statistics. 712
- Dye statistics. 257
- Glycerine trends 1919-1927. 127
- Industry's common bond in chemical engineering. 4
- Pigment statistics. 384
- Psychrometric chart for high temperature air calculations. 227
- Sodium nitrate statistics. 321
- Specific gravity and properties of coke oven gas. 243
- Structures of I. C. I., Ltd. and Kuhlmann. 8
- Structures of Allied chemical, du Pont, and Union Carbide companies. 7
- Structure of the I. G., German chemical combine. 6
- Turpentine and rosin statistics. 512
- World view of nitrogen. 348
- Chase interests, Imperial chemical joins. 249
- Chemical combine, colossal structure and ramifications of the great German. 6
- Chemical corporations, inter-dependence reflected in great. 7
- Chem. & Met. personnel changes (Edit.). 657, 660
- Chemical executives meet in Washington. 189
- Chemical kinship (Edit.). 77
- Chemicals:**
- Estimated consumption by consuming industries. 2
- Fine, manufacture installs chemical engineer. Backhaus. 173
- Foreign trade in. 45
- Lower average prices for. 57
- Underlie industrial inter-dependence. 2
- Chemical Engineer:**
- Consolidates his position on Pacific Coast (Edit.). 44
- Employment records in industry of ten typical. 11
- Euclid and the (Edit.). 75
- Fuel industries and. 347
- Functions of (S.). 241
- For industry. Parmelee (Edit.). 9
- Industrial specifications. 341
- In modernization. McCormack. 546
- Selling industrial gas as career for (Edit.). 138
- Chemical Engineering:**
- At Iowa State. Kirkpatrick. 338
- Development of. Parmelee. 9
- Industries linked to explosives manufacture. Symmes. 234
- Industry's common bond in. 4
- Inter-dependence through. 1
- In 1927 (Graph.). 56
- Leaders look for conservative progress. 46
- Chemical Show, Wide range of exhibits for Chile declares nitrate policy (Edit.). 304
- Chlorine:**
- Prices hold below prewar level. Kienle. 46
- Prices lower for 1928. 61
- When is chlorine a "poisonous gas"? (Edit.). 74
- Worth-while economies in producing caustic soda and. Kirkpatrick. 158
- Chrome green (S.). 112
- Chromium:**
- Alloy irons applied in nitric acid industry. Mitchell. 734
- Plating (S.). 111
- Plating (S.). 369
- Plating solution, Treatment of. 153
- Steels, corrosion of. Palmer. 149
- Steels employed in nitric acid synthesis. Fauser. 477
- Circulation system, modified, improves operation of chamber plant. Larison. 229
- Clarifier, Oil (E. N.). 436
- Cleaning, Dry, machinery (S.). 240
- Clutch, Spring friction (E. N.). 182
- Coal:**
- Distillation, stimulates research in France. 123
- Gas production improved by coke-oven practice. 564
- Chemical studies in processing reported at A. C. S. meeting. 276
- Heat unit cost, Calculator for (E. N.). 181
- Hydrogenating low-grade. 214
- Oxidized (S.). 495
- Processing and utilization discussed at Pittsburgh conference. Staff. 728
- Processing exemplifies unit operations. Sperr and Byrne. 22
- Second International Conference on Bituminous, discusses developments. Staff. 728
- Steam dried (S.). 631
- Tar dye, production established record in 1927. 712
- Tar industry favored by conditions in Europe. Jordan. 50
- Tar, Parr's product not true low-temperature. Church (C.). 109
- Coke and Coking:**
- Byproduct, Maintained despite slower demand. 55
- Coal (S.). 631
- Gas producer (E. N.). 698
- Growth of byproduct industry (Graph.). 54
- Heat balances in (S.). 631
- High throughput characterizes new process. Church (C.). 109
- Low-temperature, commercial prospects. McBride. 468
- Oven gas as source of hydrogen (Edit.). 722
- Oven gas gives cheap hydrogen for ammonia. Pallemarts. 741
- Ovens that give high yields of gas and byproducts. McBride. 140
- Oven practice improves coal-gas production. 564
- Oven gas properties. Stevens (P.). 243
- Products of (S.). 240
- Colloid mills (S.). 240
- (S.). 694
- Increases capacity, improves quality, lowers costs. Travis. 543
- New (E. N.). 181
- Combustion discussed at Swampscott meeting of A. C. S. 681
- Commercial organizations. 135
- Compressor, Rotary direct connected (E. N.). 635
- Concrete, porous (S.). 495
- Condenser leaks, Detecting. Callahan (P. N.). 113
- Conditioner, Unit air (E. N.). 501
- Congress, Resolution to forbid exportation of chemicals (Edit.). 74
- Consolidations, German chemical industry intent on. Daugherty. 170
- Construction materials. 566
- Controller, Recorder (E. N.). 500
- Controller, Steam-flow (E. N.). 500
- Conveyor, lock (P. N.). 496
- Oscillating (E. N.). 115
- Portable (E. N.). 183
- Portable (E. N.). 373
- Screw, steel (P. N.). 243
- Cooling apparatus (E. N.). 371
- Tower, Small spray (E. N.). 244
- Copper and brass pipe, bursting pressure of. Schneider. 104
- Sulphate meets with active demand. 58
- Welding. Silberstein (N. P.). 180
- Welding (S.). 368
- Cork (S.). 112
- Cork dust explosions, Oxygen concentration for. Edwards and Harrison. 479, 482
- Corning Glass Works, refractory production. Koehler. 87
- Cornstalks as chemical raw material. Kirkpatrick. 401
- Corrosion:**
- Boilers (S.). 760
- Criticism. Mitchell (C.). 364
- Reply. Palmer (C.). 365
- Fatigue discussed at A.S.T.M. meeting. 406
- Galvanized metal (S.). 759
- Methods and material for deducing. 614

- Refiners replace with efficient equipment, Morrell 559
- Refining (S.) 111
- Research, Committees named to direct 119
- Technologists discuss heat economics 167
- Technology, Chemical engineering pervades all, Little 12
- Vapor phase cracking interests technologists (Edit.) 44
- Pharmaceutical plant, Applying mass production methods in, Olive 79
- Phenol recovery plant avoids waste pollution, Jones 215
- Phoenix Portland Cement Corporation, Powderly, Ala. Staff 270
- Phosgene (S.) 177
- Phosphate, sodium, What are the facts about? 672
- Phosphoric acid in the ascendancy (Edit.) 658
- Pigments, Glass (S.) 111
- Pigments, lead, present highly developed technology, Nealey 219
- Pigments, Lithopone attains high place among 384
- Pipe thread compound (E. N.) 699

Plant:

- Chemical, standardization (S.) 240
- For continuous refining of oil distillates, Morrell and Bergman 350
- Location, layout and design, Modern practice in, Wood 528
- Preparations for winter, Emmarr (P. N.) 697
- Problems involved in making pure Tungstic oxide, Gero and Iredell 412
- Store room as hardware shop (Edit.) 458

Plant Notebook:

- Accurate measurement of liquid in tanks, Brennan 696
- Agitating wheel, Raymond 113
- Atomic hydrogen welding and its applications, Blanch 495
- Boiler feed water treatment advances toward status of exact science, Holmes 695
- Chemical burns 762
- Coke oven gas properties, Stevens 243
- Condensate flow-meter for evaporators, Cooley 113
- Conveyor lock 496
- Copper welding 180
- Design of heating elements for electric furnaces, Le Baron 242
- Detecting condenser leaks, Callahan 113
- Ductility of copper welds 697
- Electrical safety measures in new varnish plant, Westbrook 761
- Eliminating bubbles in fabric impregnation, Randolph 306
- Globe valve strainer 434
- Heating valves and air requirements of commercial gases, Jones 496
- Indicating flow meter 305
- Indirect firing improves furnace operation 634
- Leaky valve detector 243
- Liquid level indicator 179
- Multi-type pot furnace 370
- New principle applied to carbon arc welding 762
- Novel tank transportation 696
- Oil in process steam 306
- Oxy-acetylene lance 180
- Pipe fittings 306
- Planning board for batch control 697
- Prepare the plant now for winter, Emmarr 697
- Protection against abrasion 180
- Properties of air 434
- Protecting liquid meters from corrosion, Ahr 434
- Safe removal of caustic soda from drums, Kauffman 633
- Simple signal detects fan stoppage 434
- Small electric boiler, Rudin 434
- Speed reducer comparisons 370
- Splicing copper rod feeders 633
- Standard charts and instruments, Emmarr 243
- Steel conveyor screw 434
- Temporary tank connections, Kallam 305
- Transporting open barrels, Thomas 370
- Vacuum system leaks 432
- Plasticizing (S.) 432
- Plastics (S.) 43
- And fibers, new technology for synthetic (Edit.) 568
- Gain prominence in equipment construction, Quigley 18
- Industry, Less familiar aspects of, Ellis 483
- Pollution of stream by acid waste economically combated, Sullivan 60
- Potash, Caustic, larger distribution 47
- Material gain in output of, Teeble 188
- Regulations for Spanish production, Pota, Large vitreous (E. N.) 245
- Power and Mechanical Engineering Exposition 704
- Direct-current, for electrolytic processes, Dawson 668
- Drive, Modern increases dividends, Stanlar 533

- Failure warning (E. N.) 637
- Power show features new engineering equipment (E. N.) 763
- Preheater, Air (E. N.) 308

Pressure:

- Electrolysis of water eliminates need for compressors, Noeggerath 421
- Equipment, Electric welding in, Krase 661
- Equipment by welded construction, McBride 396
- High (S.) 111
- Synthesis of nitric acid at Novara, Italy, Fauser 474
- Production control, an essential tool of modern business, Prochazka 538
- Production, economical, makes for profitable prosperity, Klein 168
- Psychrometric chart, revised, assists high temperature design, Lavine and Sutherland 224
- Profits in a buyers' market through team work, Mehren 290
- Publications, government 112, 178, 241, 304, 369, 432, 694, 693
- Publications, Miscellaneous 246
- Pulleys, Conveyor (E. N.) 246

Pulp and Paper:

- Bisulphite liquor (S.) 631
- Chemical production increases in Germany 123
- Conference on Pacific 687
- From cornstalks, Kirkpatrick 401
- Industries based on applications of unit processes, Rue 15
- Industry, Opportunity for, Burris 238
- Mill, Efficient arrangement characterizes, Buchanan 205
- Mills meet overproduction borey (Edit.) 202
- Parchment (S.) 632
- Produced efficiently at Ste. Anne Paper company, Buchanan 285
- Production, chemical engineering aids (Edit.) 41
- Sulphate, Longrien mill evolves new technique for, Wertheimer 597
- Pulverizer, Ball mill unit (E. N.) 114
- Pulverizer, Unit coal (E. N.) 244
- Pumping fused salts (S.) 632
- Pumping unit, portable (E. N.) 700
- Pump, Motor-connected (E. N.) 310
- Acid resisting (E. N.) 374
- Corrosion-proof centrifugal (E. N.) 767
- Float-controlled sump (E. N.) 765
- Low head (E. N.) 767
- Proportioning (E. N.) 437
- Unit motor (E. N.) 117
- Purifier, Carbon dioxide (E. N.) 182
- Purifier trays (E. N.) 766
- Pyrometer, New surface (E. N.) 182
- Pocket (E. N.) 636

Q

- Quencher, Small dry (E. N.) 764

R

- Radiator, High convection (E. N.) 436
- Radio control of paper drying features T. A. P. P. I. sessions 166
- Raw materials control facilitates carbon products manufacture, McBride 724
- Raw materials for dry-cell industry, Camp 154
- Raw materials, Inter-industry movement of some of the principal chemical Rayon, greater strength and improved appearance 565
- Industry, British, Developments in 188
- Production in Great Britain and France 252
- Spinning (S.) 240
- Recorder, CO₂ and draft (E. N.) 310
- Recorders, Flush-type (E. N.) 183
- Recorder, New temperature (E. N.) 244

AUTHORS' INDEX

- ALLEN, E. M.** Modernization for self preservation 522
- Anable, A.** Extremes of size characterized development in continuous thickeners 572
- Austin, Martin F.** Large business transacted in vegetable oils 52
- BACKHAUS, A. A.** Chemical engineer replaces the apothecary in fine chemical manufacture 172
- Bacon, Raymond F.** Record shipments of sulphur in export trade 50
- Badger, W. L.** Efficient evaporators from better understanding of heat transfer 576
- Baker, Edwin M.** Progress in gas absorption and adsorption 578
- Barrett, E. P. and C. E. Wood.** Muffle-type pot furnace (P. N.) 179
- Bergman, D. J. and J. C. Morrell.** Designing equipment for chemical treatment of oil distillates 210, 291, 350
- Bernewitz, M. W. von.** Water softening with barium salts (C.) 299
- Bertolet, Elmer C.** The textile industries need influence of chemical engineering 38
- Bitler, W. P. and J. H. James.** The catalytic oxidation of oils on a commercial scale 156
- Blanch, F. D.** Atomic hydrogen welding and its applications (P. N.) 495
- Bragg, G. S.** Dehydration of gas efficiently accomplished at low cost 731
- Branche, N. T.** Fundamental principles in design of gas burning equipment 357
- Brennan, J. M.** Accurate measurement of liquid in tanks (P. N.) 696
- Brown, Bruce K.** Large scale titanium pigment production based on old laboratory process 427
- Buchanan, A. E. Jr.** Efficient arrangement characterizes modern newsprint mill 205
- Modern engineering answers the call for lower costs in newsprint 285
- Bueb, Julius.** A world view of nitrogen economics 348
- Burgess, George K.** Electric rotary calciner (C.) 109
- Burris, W. H.** Opportunity for pulp and paper industry (C.) 238
- Buttfield, Gibson.** Advances in reclaiming tin from silk weighting washings 607
- Byrne, J. P. and F. W. Sperr, Jr.** Coal processing exemplifies unit operations 22
- CALLAHAN, W. E.** Detecting condenser leaks (P. N.) 113
- Camp, A. D.** Chemical raw materials for dry-cell industry 154
- Carleton, R. A.** Electrical heating field broadened by container-resistance 102
- Chesnut, Frank T.** Magnesia-graphite reactions at high temperatures 687
- Chipman, R. N.** Improved dusting equipment in insecticide trade 49
- Church, S. R.** Parr's product not true low-temperature coal tar (C.) 109
- Clark, Farley G.** Questions cost of synthetic ammonia (C.) 236
- Clifford, W. E.** Wood distillation industry turns hopefully to the chemical engineer 32
- Cohen, Joseph H.** Control, equipment, methods help modernize gelatine manufacture 561
- Cooley, L. C.** Condensate flowmeter for evaporators (P. N.) 113
- Cooper, A. T.** Can you "Do it better with gas" (C.) 489
- Cundall, K. N.** Drying sulphur recovered from manufactured gas 407
- Correct efficiency should be 41.7 per cent (C.) 489
- Cuno, Charles W.** Chemical engineering applied in new St. Louis water plant 230
- Providing chemical treatment for petroleum emulsions 165
- Curtis, Harry A.** Factors affecting world nitrogen situation 469
- DAUGHERTY, WILLIAM T.** German chemical industry intent on world consolidations 170
- Dawson, E. B.** How direct-current power is made for electrolytic processes 608
- De Wolf, Philip.** Installment buying of chemical equipment (C.) 299
- Dinkins, P. M.** Rising trend to values for mineral acids 48
- Dodge, Barnett F.** Isotherms and isobars air separation studies 622
- Drew, Raymond L.** Dissolving drum caustic (C.) 110
- EDDY, LAURENCE.** What's wrong with the plant engineering office? 682
- Edwards, P. W.** New data on oxygen concentration for explosion prevention 479
- Ellerbe, William Leon.** Electric rotary calciner (C.) 109
- Ellis, Carleton.** Less familiar aspects of plastic industry 18
- Emmarr, Fred.** Prepare the plant now for winter (P. N.) 697
- Standard charts and instruments (P. N.) 633
- FAUSER, GIACOMO.** Concentrated nitric acid directly attained in pressure synthesis 474
- Ferguson, H. K.** Well designed buildings pay their way 536
- Field, B. E.** Preventing excessive wear in mills for crushing and grinding 96
- Fink, G. J.** Lime industry adapts modern attitude 558
- Flynn, E. D.** Continuous vacuum filters find new uses in salt and paper industries 574
- Fritz, H. E.** Rubber coverings shield equipment from corrosion and abrasion 566
- GERO, W. B. and C. V. Iredell.** Making pure tungstic oxide involves many unusual plant designs 412
- Gill, L. M.** Adsorption from liquid phase used in many operations 579
- Glick, Bernard N.** Modern purification methods using activated carbon 581
- Greaves-Walker, A. F.** Inter-dependence of ceramic and chemical engineering industries 20
- Groggins, P. H.** Nitration—a unit process of chemical engineering 466
- Gumz, J. H.** A live issue relapses (C.) 755
- HARRIS, JOHN P.** Vegetable oil industry pins faith on ascendancy of engineer 30
- Harrison, R. W.** New data on oxygen concentration for explosion prevention 470
- Harvey, Ellery H.** A note on the corrosive action of sulphur monochloride 684
- Hatch, Roswell F.** How do patents affect my business? 99
- Healy, J. J. Jr.** Basic nature of heavy chemical industry insures constant opportunity 361
- Healy, L. J. D.** Chemical health hazards in the rubber industry 621
- Hemingway, H. J.** Creosote overproduction considered remote danger (C.) 754
- Höglund, Bo.** Calculation shows minimum surface for evaporators 569
